Date of Birth:	26-Nov-1956

Communication Phone Call:

- **Phone Call Duration:** 25 minutes
- **Note Taking Duration:** 5 minutes
- **Participants:** Andrea, Janelle (Andrea’s daughter), Occupational Therapist (OT)

Subjective (S):

- Janelle reported that Andrea had a fall at home at night while she was asleep. Andrea's medical alert watch called the ambulance automatically.
- Janelle described how the ambulance crew used a special air-pumping mattress to safely lift Andrea from the floor to the bed. This mattress inflates beneath the person, raising them to bed height with minimal physical effort.
- Janelle expressed a strong interest in acquiring similar equipment to ensure Andrea’s safety at night and to facilitate safer, more manageable lifts after falls.
- Janelle stated that this equipment would be particularly useful for lifting Andrea without needing manual handling, which she finds challenging.

Objective (O):

- No direct observations or interventions were performed by the OT during this call.

Assessment (A):

- No assessment was conducted during this call. The conversation was primarily focused on gathering information and understanding the family's needs and the circumstances of the fall.

Plan (P):

- The OT will investigate the specific equipment mentioned by Janelle, namely the air-pumping mattress used by the ambulance service.
- The OT plans to contact the local ambulance service to inquire about the brand and model of the mattress and any possible suppliers.
- Upon gathering the necessary information, the OT will compile a mid-cost Assistive Technology (AT) report to facilitate the acquisition of the air-pumping mattress for Andrea's use at home.
- The OT will follow up with Janelle to discuss findings, potential suppliers, and next steps for purchasing the equipment.

report writing

Patient

Name:	13 Andrea Lee-Berner
Date of Birth:	26-Nov-1956

Appointment Details

Practitioner:	Daisy Wang
Date / Time:	20-May-2024 5:30 am
Duration:	90 minutes
Location:	visit
	-
	Australia

- **Date:** May 20, 2024
- **Session Duration:** 1.5 hours
- **Note Taking Duration:** 10 minutes
- **Travel Time:** 30 minutes
- **Location:** Andrea's home
- **Attendees:** Andrea, Janelle (Andrea's daughter), Occupational Therapist (OT)

Patient

Name:	13 Andrea Lee-Berner
Date of Birth:	26-Nov-1956

Subjective (S):

- Andrea expressed satisfaction with the recent modifications in her home, specifically praising the newly installed electrical bed and the completion of the flooring.
- Andrea mentioned her happiness with the service and the enhanced environment in her home.
- Janelle reported the need for an over-the-bed table to facilitate Andrea's reading and writing activities.
- Andrea requested non-slip mats beside her bed to prevent falls when getting out of bed.

Objective (O):

- Upon arrival, OT was shown the new bed features by Andrea who demonstrated their functionality.
- OT assessed the lighting in the bathroom and noted inadequate lighting conditions; only one light was present at the vanity, with no overhead lighting.
- The bathroom's shower area has a high step, which restricts Andrea's ability to shower independently.
- Andrea commented on the toilet's size and proximity to the door as being problematic due to her weight.

Assessment (A):

- The home modifications have significantly improved Andrea's satisfaction and mobility within her living space. However, several areas require additional improvements to enhance safety and accessibility.
- The lighting in the bathroom is insufficient, particularly for Andrea's needs, and poses a risk for accidents.
- The current shower setup and toilet configuration do not adequately accommodate Andrea's mobility and physical requirements, necessitating further modifications.

Plan (P):

- **Over-the-Bed Table:** OT will research and arrange for the purchase and installation of an over-the-bed table to support Andrea's reading and writing activities.
- **Non-Slip Mats:** OT will source and order non-slip mats to be placed beside Andrea's bed to enhance safety when exiting the bed.
- **Bathroom Modifications:**
 - **Lighting:** OT will plan an upgrade for the bathroom lighting, including the installation of an overhead light to ensure adequate illumination.
 - **Shower Modification:** OT will coordinate with a contractor to remove the high step at the shower entrance and replace it with a step-free shower space that includes a curtain for easier access.
 - **Toilet Replacement:** OT will investigate options for a larger toilet that is more suitably positioned within the bathroom. This will involve coordination with a plumber to ensure proper installation.
- **Follow-Up Visit:** Schedule another on-site appointment with a builder and Andrea to further assess the space and finalize the home modification report.
